SUMMARY

Experienced Software Engineer with 5+ years of expertise in developing high-performance mobile/front-end applications. Proficient in Kotlin, Java, Coroutines, Dagger, Jetpack Compose, ReactJs, and NodeJS. Proven track record in optimizing app performance, enhancing user experience, and delivering robust, stable, and scalable software solutions. Adept at collaborating with cross-functional teams to achieve business goals and drive continuous improvement.

QUALIFICATIONS

- **Skills: Proficient** in Android, ReactJS, Kotlin, Java, C++, Python, JavaScript, Typescript, XML, HTML, CSS, MySQL, RESTful APIs, Gradle, Jetpack Compose, Unix Shell Scripting, Git, System Design, Dagger, Room, Coroutines, RxJava, MySQL, JUnit, Jest, Node.js, JIRA **Familiar** with Flutter, React-Native, C, NoSQL, Haskell, GraphQL APIs, Angular, SwiftUI, Jenkins, Linux,
- **Frameworks/Tools:** AWS, IntelliJ, Android Studio, Jupyter Notebook, NodeJS
- **Misc:** AGILE Principles, Honorable Discharge Air Force Veteran, Secret Clearance

EXPERIENCE

Senior Software Engineer, Insulet, San Deigo, CA

Nov 2024 – Present

- Designed and developed high-quality Android mobile applications and SDKs using Java, Kotlin, and KMM, delivering medical-grade solutions for patient and device-centric products.
- Collaborated with cross-functional teams to define, design, and deploy new features and software releases, ensuring alignment with customer and market needs.
- Architected and built next-generation cloud-based mobile application platforms, supporting scalable and secure solutions for future healthcare products.

Software Engineer, Amazon, Sunnyvale, CA

May 2022 – Nov 2024

- Refactored substantial portions of the codebase to properly implement MVVM (Model-View-ViewModel) architecture, improving code organization, testability, and maintainability.
- Managed the end-to-end software development lifecycle for Amazon Kids and Amazon Kids Browser app, collaborating with 4+ cross-functional teams, implement 4 new features for 1,000,000+ users leading to a 10% increase in revenue and a 10% boost in engagement.
- Implemented proactive monitoring and automation, utilizing 30+ AWS CloudWatch metrics and alarms, ensuring 100% application uptime
- Leveraged customer metrics to drive continuous app improvements, implementing 20+ updates to functionality and design, aligning with customer needs and business goals.
- Migrated key components of Kids Browser app from traditional Kotlin + XML to Jetpack Compose, enhancing UI development efficiency and maintaining consistency across the app's user interface.
- Implemented 200+ unit tests and debugged 20+ critical application issues, including crashes, memory leaks, and concurrency problems, ensuring app stability and performance.

Software Engineer, Alameda Food Bank, Alameda, CA (Volunteer Work)

Aug 2023 - Sep 2023

- Developed a robust ticketing system for the Alameda Food Bank using Express.js and SQLite3, resulting in a 30% increase in operational efficiency.

- Designed and implemented 6 RESTful APIs to enable seamless communication between frontend and backend components, enhancing system functionality and user experience.
- Utilized SQLite3 as the database solution, optimizing data storage and retrieval for scalability and performance.
- Developed RESTful APIs to facilitate communication between the frontend and backend components, enabling seamless interaction with the system.
- Conducted 5 comprehensive training sessions and provided ongoing support, empowering 20+ volunteer members to effectively utilize the system and streamline workflows.

Software Engineer, Fidelity, San Francisco, CA

Mar 2020 – May 2022

- Developed new features for proprietary banking apps on Android phones and tablets, enhancing user experience and functionality for 500,000+ users.
- Implemented 20
- 0+ unit tests and debugged 20+ critical application issues, including crashes, memory leaks, and concurrency problems, ensuring app stability and performance.
- Automated company app build and test processes through Jenkins, reducing build times by 10% and improving efficiency.
- Collaborated with 3 Software Architects to determine technical feasibility and best approaches for 20+ customer requests, ensuring alignment with business objectives.
- Work on location tracking agents, analyze user habits, summarize data in user-friendly format, log and connect external fraud detection SDK.
- Collaborate with graphic designers and digital branding specialists to produce / define style guidelines.
- Consistently resolved issues on time and ahead of schedule, clearly communicated issues across multiple teams and external vendors ensuring synchronicity.

Software Developer Internship, Infinite Options, San Jose, CA

Jan 2020 – Mar 2020

- Created, modified, maintained SQL procedures to consume data from multiple excel sheet, analyze customer data, identify best-selling product, tracked trends of Key Performance Indicators (KPI), and ported complete and accurate data into new master table.
- Designed backend server API adhering to RESTful architecture then implement with NodeJS, Express.
- Designed frontend website, then implement with ReactJS, connected Google Calendar API and Firebase Firestore to our backend server extend functionality of web page.

Staff Sergeant and Mechanic, United States Air Force, Misawa AB, Japan

Oct 2007 – Jul 2014

- Performed maintenance and inspections on over 1.5K pieces of aircraft equipment valued at \$32.3M.
- Security Escort for third country personnel in Republic of Korea.

Supported training and contingency missions of 5 different aircraft: A-10, F-16E, C-130, B-1, J-Star.

EDUCATION

University of California, Santa Cruz

Bachelor of Science in Computer Science

Sep 2019

Santa Cruz, CA

- Graduated with 3.22 GPA, Member of Association for Computing Machinery.

Chabot Community College

Associate of Science in Math and Computer Science

Sep 2017

Hayward, CA

- Graduated with 3.45 GPA, Two Time Recipient of Veteran's Scholarship, Dean's List Spring 2017
